## SUBJECT

AREA: Defensive Missiles/Ground Forces

## DISTRIBUTION:

All PIs

## IEG PI NOTICE

No. 11-76

## TITLE/SIGNIFICANCE:

Indications of impending deployment of the SA-6 and SA-8 tactical SAM systems.

COMMENT: The last four deployments of tactical SAM systems (two SA-6 and two SA-8) along the USSR-CHINA Border have been preceded by the construction of a large vehicle storage building in the AAA regiment area. Three buildings were 240' x 80', one was 240' x 60'. In addition, four or five gambrel-roof quonsets were built at installations which received the SA-6.

Installations at which similar construction begins should be considered prime candidates for SA-6 or SA-8 deployment.
